

NATURE TRUST PHOTO NEEDS

COASTAL LANDSCAPES

- Shots from high vantage points
- Rough seas, crashing waves
- Coastal marshes, tidal flats
- Beaches, dunes
- Intertidal zone
- Fog shrouded coastal forests
- Coastal cliffs

FLORA AND FAUNA

- Close ups/eye catching shots of COSEWIC listed coastal plain flora species (eg. Thread-leaved Sundew, Pink Coreopsis, Sweet Pepper-bush) and other species at risk (eg. Eastern White Cedar, Ram's Head Lady Slipper, Boreal Felt Lichen)
- Floodplain forest rare plants
- Waterfowl: close ups, pair shots or congregations (eg. Harlequin Ducks, Eiders, Goldeneyes)
- Shorebirds: close ups, or flock shots (eg. all the Plovers [particularly Piping], Sandpipers, Yellowlegs, Roseate Terns)

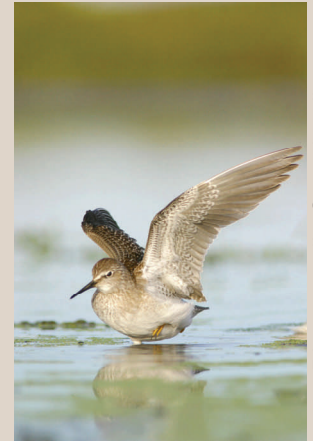

Photo credit: Scott Leslie

SPECIFIC HABITATS

- Gypsum Karst
- Shoreline: Atlantic Coastal Plain Flora sites and habitat
- Old growth forests and large trees

SEASONAL

We need photos from all four seasons, but we are particularly short on winter shots at this time.

OTHER TYPES

- Abstract and macro shots
- Portrait/vertical shots
- People kayaking, hiking, canoeing, enjoying nature

NATURE TRUST PROPERTIES

We have properties throughout the province and are always in need of good photos taken on all of them! If you wish to contribute by visiting and photographing Nature Trust properties, please contact our office to have a discussion about which properties might suit you best.

To see a map showing relative locations of all of our properties visit:

<http://www.nsnt.ca/ourwork/explorer/>

We require print quality photographs (300 DPI).
