Nature Trust at: www.nsnt.ca or 425-LAND

Nova Scotia Nature Trust is proud to present a play celebrating the remarkable life and legacy of Rachel Carson. She was the first scientist to warn of the dangers of chemical pesticides, effectively launching the environmental movement in the early 1960s. This one-woman show is written and performed by the acclaimed American actress Kaiulani Lee.

"...the play was just enchanting and very emotional... Rachel Carson was a great hero to me and shaped my environmentalism. Her words are every bit as relevant today as they were 45 years ago."
— David Suzuki
