Why I ♥ Nature

Share why you love nature!
Visit us on Facebook, Instagram or Twitter or email your photo to nature@nsnt.ca
Like many of you, I’ve recently been rediscovering the joy nature brings, and feeling grateful for how nature heals and rejuvenates. It has been a rough few months, but nature has been there—for all of us. So it is especially heart-warming to reflect on the gains we’ve made in protecting treasured wild spaces and species, ensuring nature’s future.

Thanks to your kind support, we’ve expanded our spectacular coastal wilderness in Cape Breton and freshwater legacy on the St. Mary’s River. We saved islands crucial for our beloved birds, and sanctuaries for endangered plants and turtles. We are making real progress in protecting Nova Scotia’s most important natural spaces, forever—places we can all enjoy and where nature can thrive.

It’s inspiring too, to see more Nova Scotians taking action for nature. Through your generosity, over 350 volunteers are helping to keep our wild areas protected, and our education and outreach initiatives are growing.

We’ve built collaborations with conservation partners across the province and with land trusts across the country, creating synergies and capacity for even bigger nature conservation wins ahead.

We are so grateful to all of you—the donors, sponsors, volunteers, landowners and conservation partners who make these important conservation achievements possible.

Looking ahead, the urgency to protect habitat, and to reverse biodiversity loss, continues to grow. Fortunately, opportunity for action is growing too. With bold global and national commitments to protect 30% of the landscape by 2030, historic investments in biodiversity conservation and a renewed passion for nature in our communities, a window has opened.

While pandemic-related challenges will continue, our path is clear. Emboldened by your faithful support, our plans are ambitious. We commit to DOUBLING our protected areas network by 2023. That means protecting more land in four years than we have saved in our first quarter century. Because nature matters. And nature needs us now, more than ever.

Bonnie Sutherland
### Big Wins for Nature

**Protected, Forever**

- **Conservation Lands Saved**: 125
- **Acres Protected**: 15,868
- **Achieved in 2019 / 2020**: 1,130

- Landowners we've helped leave a legacy: 85

#### Saving the Species We Love

<table>
<thead>
<tr>
<th>Species</th>

<tr>
<td>For Mainland Moose</td>
<td>25</td>
</tr>
<tr>
<td>For Rare Plants and Lichen</td>
<td>27</td>
</tr>
<tr>
<td>For Species at Risk Birds</td>
<td>18</td>
</tr>
</tbody>
</table>

#### Acres of Irreplaceable Habitats Saved

- Habitat for species at risk: 7,400
- Freshwater habitat: 9,200
- Coastal habitat: 8,200
- Old and unique forests: 4,300
- Karst habitat (gypsum cliffs and caves): 375

[Image: Illustration of nature and children]
Blanding’s turtles are easy to spot with their bright yellow neck and great big smile. But things aren’t actually cheery for these turtles—they are at risk of extinction across Canada. And they need our help.

12 Blanding’s turtle sanctuaries
825 acres of turtle habitat

ST. MARY’S RIVER LEGACY
A growing ‘ribbon of green’ on the renowned St. Mary’s protects old growth forests, endangered turtles and birds and Atlantic salmon.

13 conservation lands
1530 acres
23 kilometers of shoreline

FOR THE BIRDS—TUSKET ISLANDS SANCTUARY
Peases Island adds to a growing network of Nature Trust protected islands in “the Tuskets,” a chain of islands globally significant for bird recovery and conservation.

1000 acres saved

SAVING CANADA’S RARE PLANTS
Nova Scotia is home to a very unique group of plants known as Atlantic Coastal Plain Flora. Eleven species are at risk of extinction and are found nowhere else in Canada. Our work is critical to their survival.

15 protected sites
1340 acres
The Special Places You’ve Saved

Thanks to you, more of Nova Scotia’s unique natural legacy is protected, forever. For nature, and for people, too.

A - BEVIS POINT & LONG HILL
On the shores of the beautiful Bras d’Or lies a dramatic landscape of towering trees, mossy mounds, sinkholes, caves and underground streams, carved from the soft gypsum rock beneath. Such ‘karst’ habitat, sheltering old growth forests, rare plants and endangered bats, is globally rare. With less than 1% of Nova Scotia’s karst protected, saving three new sites (340 acres) is great news for nature. Special thanks to Jack MacKillop for so generously donating his land.

B - MABOU HIGHLANDS
The majestic beauty and stunning trails of Cape Breton’s Mabou Highlands are treasured by outdoor lovers across Nova Scotia and beyond. After two decades of work, an incredible conservation vision has come to fruition. We added 230 acres this year, now linking together over 5000 acres of spectacular protected coastal wilderness.

C - NORTH MOUNTAIN RIDGE
We continue to fill critical conservation gaps on North Mountain. Two new sites protect important wildlife corridors, connecting the Bras d’Or lakeshore, steep slopes and mountain plateau. They also link existing land trust and provincial protected areas, ensuring landscape connectivity essential for biodiversity to thrive. The 180 acres of hardwood forests and wetlands are home to rare and endangered birds, from Tree Swallows and Eastern Wood-Pewee to Rusty Blackbirds.
D - GILLFILLAN LAKE
Gillfillan Lake is one of just a few Nova Scotian lakes suited to the rare and beautiful Plymouth Gentian. A new protected area meets the unique habitat conditions this endangered plants need to survive and thrive. The site adds to a growing assemblage of connected habitat on Gillfillan and nearby lakes.

E - MEDWAY RIVER
Another win for Canada's endangered Blanding's Turtle! A 245 acre site on the Medway River helps link together a wildlife corridor essential for Blanding’s and Snapping Turtles, rare birds and plants. The site builds on existing Nature Trust conservation lands, the Medway River and Katowe’katik (formerly McGowan Lake) Wilderness Areas.

F - PEASES ISLAND
This small, treeless and windswept isle has remarkably big significance for birds. Its coastal barrens, beach, cliffs, salt marsh and lagoons support a surprising diversity and number of birds, all year long. It provides an essential resting and feeding stopover for migratory birds, excellent overwintering and nesting habitat too, for endangered species like Roseate Terns.

G - ST. MARY’S RIVER
The St Mary’s is a provincial jewel and hub of conservation focus. It features some of Nova Scotia’s best remaining Acadian floodplain forests, old growth forests, and critical habitat for endangered Wood Turtle, moose, rare forest birds, and Atlantic Salmon. A new protected area adds 137 acres to our significant and growing conservation corridor, a living ribbon of green, on this beloved river.

Our sincere thanks to all the landowners who made these conservation achievements possible.
Conservation Highlights

COLLABORATION AND CONNECTIVITY

Two emerging themes in our conservation efforts are collaboration—building creative, synergistic partnerships to advance land conservation and stewardship, and connectivity—protecting and linking biodiversity on the landscape scale.

CONSERVATION POWER THROUGH PARTNERSHIP

As part of Canada’s commitment to protect 25% of lands by 2025 and 30% by 2030, we’ve launched an ambitious four-year biodiversity conservation drive in collaboration with land trusts, governments and Indigenous partners.

- Making major land conservation gains
- Planning a comprehensive, interconnected protected areas network for Nova Scotia
- Supporting Nova Scotia’s first Mi’kmaw Protected and Conserved Areas
- Building capacity and removing barriers to biodiversity conservation and stewardship

COASTAL ISLANDS COLLABORATION

We are leading an innovative partnership that brings together the brightest minds and shared passions for saving and stewarding birds and coastal islands.

- Prioritizing Nova Scotia’s coastal islands for protection and stewardship action
- Linking bird research with on-the-ground stewardship action
- Piloting a collaborative island stewardship model, engaging government and non-government conservation partners, academics/researchers, local communities and citizens

CONNECTIVITY

A growing conservation focus globally and here at home is assembling large, contiguous protected areas, linked by natural corridors. Such connectivity ensures wildlife can roam and biodiversity can thrive over time and through climate change. Your support is helping us to create landscape connectivity all across the province, from the 100 Wild Islands to the urban wildlands of the Blue Mountain Birch Cove Lakes.
Safeguarding our Natural Legacy

We have now saved over 15,000 acres of magnificent Nova Scotia nature. Ensuring these special places are protected, forever, requires a robust and active land stewardship program. You’ve helped to build our capacity and capability this year, ensuring we can meet increasing stewardship demands for a rapidly growing protected areas network.

STEWARDSHIP HIGHLIGHTS

- Completed 40 baseline reports for conservation sites—double our previous annual achievement
- Worked alongside local fishing families to plan stewardship of the renowned Seal Island
- Identified potential new trails for the 100 Wild Islands
- Created a new model for trail and recreational planning, balancing conservation with growing interest in access to nature
- Completed exciting work to grow our “Property Guardians” program—empowering volunteers to do what they love—caring for these beautiful wild places
- Restored a dump site at Barren Meadow with a team of enthusiastic volunteers, ensuring safety for its resident Blanding’s Turtles
- Partnered with the Nature Conservancy and Kingsburg Coastal Conservancy to repair hurricane damage at Gaff Point
Volunteer Program Highlights

• 350 volunteers. 75 new recruits this year!
• 54 new Property Guardians trained—three times more than last year
• Volunteers completed 88 visits to Nature Trust conservation lands
• Launched pilot volunteer ‘hubs’ on the St Mary’s River and 100 Wild Islands, a community-led volunteer engagement model we will expand across the province
• Successfully piloted a popular new group stewardship event series
• Joined with partner organizations to create the Southwest Nova Scotia Volunteer Engagement Strategy, working to increase engagement in stewardship and citizen science across the region

OUR FABULOUS VOLUNTEERS

We know time is precious, and life gets ever busier. We know too that conservation success depends on active volunteers. We are so thankful to all who give the gift of time, energy and expertise to our cause.

Dave and Seely Alder,
Property Guardians for Devil’s Jaw and Herbert River Conservation Lands

“We thrive in nature; it inspires and revitalizes us. We touch base with nature every day of the year. Even in a blizzard, we will head out for a snowshoe. In the summer, we kayak right off our yard and enjoy the magic of loons and a visiting eagle. Nature gives us so much. Because we love exploring the outdoors we decided to channel some of our energy to give back to nature. If we protect nature, nature will protect and provide for us.”
Alix d’Entremont is a long-time Bird’s Eye View volunteer and serious bird enthusiast from Middle West Pubnico.

“The sea has always been an important part of my life. Outside of work, my world is virtually nothing but birds. I am definitely at my happiest when I am on my boat, hopping from island to island to gather information on our breeding and migrant birds for the Nature Trust.”

Roy Parker feels a love and respect for the eastern shore lands he stewards as a Property Guardian. He spent summers as a child on his grandparents’ farm and fly fishing in the Musquodoboit Valley and now has a cabin close to the Tangier River Conservation Lands.

“With the help of friends and Nature Trust staff, we’ve cleaned up the property, added signage, marked abandoned mining survey pits, and cleared trails. It is rewarding to be active, knowing that what you are doing is helping other people enjoy nature, and helping protect this land for the future.”

Events and Outreach

CONNECTING WITH NATURE EVENTS

Our popular Connecting with Nature events bring opportunities to explore, discover and connect with nature on our conservation lands across the province. Participants learn about our wild places and imperiled species, and help celebrate conservation successes.

After nearly 20 years in the making, we celebrated 2000 acres protected in the Mabou Highlands with a community celebration and hike with the Cape Mabou Trail Club.

On a Bon Portage Island adventure, volunteers joined Nature Trust staff and Acadia University researchers, learning about Leach’s Storm-Petrels and restoring the island’s trails to minimize impacts on nest burrows.

Students and staff from Barrington High joined Nature Trust staff and volunteers for a beach clean-up, collecting 150 lobster traps and 35 bags of garbage, keeping the beach safe for Piping Plovers and people too.

An enthusiastic crowd helped celebrate a record number of new conservation lands achieved through the Lasting Landscapes campaign at the 2019 Conservation Showcase.

Paddlers and hikers explored the magical coastal wilderness of the 100 Wild Islands on a popular guided nature tour.

LANDOWNER OUTREACH AND EDUCATION

Our conservation team was active all across the province, meeting with priority landowners, providing education and inspiration to encourage conservation action, and technical support and guidance for landowners ready to protect land.
Legacy Circle members gathered for a special celebration, welcoming new inductees and honouring all for their legacy gifts. Please let us know if you have included the Nature Trust in your estate plans (a gift of land or bequest) so we can welcome you to our Legacy Circle!

The annual Guardians of the Land field trip gave this special group of donors (who provide critical, multi-year unrestricted funds) a behind-the-scenes look at our conservation work, spending time with conservation staff and visiting potential conservation lands.

The transformation continues at Nature’s House, with new gardens of generously donated wildlife-friendly, low water, native Nova Scotian plants, including Black Ash provided by our friends at the Confederacy of Mainland Mi’kmaq!

A record crowd of friends old and new helped celebrate 25 years of conservation wins at our Silver Anniversary Dinner. Thank you to our event sponsors, conservation table sponsors, auction donors, emcee Jayson Baxter, musical guest Jenn Grant, and to all our guests for your generous support and enthusiastic endorsement of the cause.
Thank you to our Conservation Heroes

Thanks to your generous support, the Nature Trust is a driving force for land conservation in Nova Scotia. You’ve made inspiring, important conservation achievements possible. Whether your gift was large or small, it has made a difference and we thank you! You are all conservation heroes.

YOUR STORIES

David Rumsey was honoured with the 2019 Nature Trust Conservation Award, recognizing his extraordinary contributions and leadership that brought an incredible coastal wilderness legacy to fruition.

Over 20 years ago David Rumsey helped to seed a vision of protecting a vast and beautiful, unspoiled coastal wilderness in the Mabou Highlands. The complex multi-landowner project met many obstacles over the years and progress waned. But in 2018, with development pressures mounting, David saw an urgent need for action. He and his wife Abby first donated a conservation easement on their own lands. He then offered to reach out to all of his neighbours. With his enthusiasm, passion, and by leading by example, he inspired them all to protect their land. And he didn’t stop there. Retired from a successful career as a developer (and artist, map collector and many other fascinating things), he expertly negotiated and shepherded every property deal. It was a volunteer effort beyond anything we’ve seen in 25 years of conservation. We then just needed the funding to make it all happen. With one final hurdle to overcome, David and Abby stepped up, generously donating over $650,000 and leveraging the remaining funds needed. The 2,000 acre Mabou Highlands Coastal Wilderness is now protected, forever—one of Nova Scotia’s most treasured natural, cultural and historic landscapes.

David’s passion, determination, leadership, and volunteer contributions are truly inspirational. Enjoy David’s full story on our blog www.nsnt.ca/blog.
For over 30 years, Dick Henry owned and stewarded Peases Island, continuing a multi-generational passion and concern for birds.

“I grew up banding birds on the Tusket Islands with my mother, the late Marie Curnen Henry. She was a devoted bird watcher who passed on her love of birds and these islands to me and to her grandchildren. When the opportunity arose to acquire Peases Island I didn’t hesitate. After 30 years of stewarding the island, it means a lot to me and my family to entrust the island to the Nature Trust, and to know it will always be there, as a safe refuge for the birds.”

Ellen Gordon is a Nova Scotian by birth and at heart, but like many Bluenosers, has spent much of her life away.

“I developed my love of nature at our summer cabin on Ponhook Lake. I would listen for my favourite Hermit Thrush in the woods, and that song has made me feel at home in other places too. My parents loved to take us on picnics by rivers and lakes wherever we were living. It was always easy to access such spots. But it has become progressively more difficult, with so much land in private hands. My heart will always be in Nova Scotia. Knowing I am doing my part with monthly support gives me a sense of belonging to my heartland, even when I’m over a thousand kilometers away.”

Originally from the US, Eugene Lebwohl and his wife Ruth Matthew spend summers on the Bras d’Or. Both value nature deeply and feel it is a privilege to be helping save Nova Scotia’s natural legacy through a gift in their wills.

“While backpacking here, I found that Nova Scotia, and especially Cape Breton, got into my bones, and anchored in my consciousness. We will leave this life with a substantial gift that will, over time, protect that unique and still relatively unspoiled piece of the world that is Nova Scotia. It will create change that will last beyond the immediate ripple of our lives. It’s our way to say thank you to a place that has given us joy, offering to future generations what the generosity of past contributors has given us.”
Rene Scrutton, a long-time volunteer and supporter, wanted to do something special to help save nature. She also wanted to honour her late father, Laurie Rhydwen. She was able to achieve both with a gift to the Nature Trust’s endowment fund.

“What I really like about the endowment fund is knowing that Dad’s money will continue to support the Nature Trust, year after year, forever. I can see every day how Dad’s legacy is supporting the vital conservation work, helping in ways large and small to preserve the wild places of our beautiful province.”

Judy Robertson and her daughters Stephanie and Marine are all active environmentalists. With both daughters now engaged in the outdoors and natural sciences, dinner conversations often turn to the environment and the need to protect our fragile resources. Judy, an active volunteer and board member, became a Guardian of the Land this year, donating on behalf of herself and her daughters.

“I wanted to recognize my daughters’ passion for environmental protection, and to reinforce the message that the work of the Nature Trust is for future generations. Becoming Guardians of the Land made all of this possible.”

Financial Accountability

This year (April 2019-March 2020) we invested 2.68 million dollars (89% of expenses) in our charitable programs. These funds supported land conservation, stewardship, education and engagement.

We maintained a healthy balance sheet, with no long-term debt and $18.1 million in conservation lands. We have secured $7.56 million in endowment funds – a testament to our commitment to organizational sustainability and meeting our long-term land stewardship commitment to the lands entrusted to our care.

Our financial statements are audited annually by an external auditor. Investments are managed by investment professionals Connor, Clark and Lunn, overseen by an Investment Committee and subject to our investment policy.
